

Future Plans

- ☐ Planning on making the cursor movable
- ☐ Better function naming
- ☐ Developer version
- ☐ Separate js file link

Version Changes

1.1.1

Fixed backspace in spaces

1.1.0

Various Fixes

- Made *pEnter()* independent from *gmst.input*
- Separated *gmst* style values and moved them to new *systemstyle* variable to avoid confusion

1.0.3

Various Fixes

- *arrowtxtup()* can now be toggled on or off
- Fixes in *changesrcv()*, *changesrca()*, *outptv()*, and *outpta()*
- Added dimension customization for *correctimg()* and *correctvid()*
- New functions: *resetAnim()*, *changeheighti(x, y)*, *changewidthi(x, y)*, *changeheightv(x, y)*, and *changewidthv(x, y)* .

Bugs Found

- The play button for audio and video files will create an error: `Uncaught TypeError: Cannot read properties of undefined (reading 'play') at HTMLButtonElement.onclick`

1.0.2

setupanim() change

- Adds a default value to y (1) in the case that it is undefined

1.0.1

***cursor()* fix**

- Fixes the gmst.input troubles for loading cursors and gmst.loadlock
- Better cursor blinking (reappears when a character is typed)

1.0.0

version 1
